

2023 Honors Project

By: Jaden Galindo

WHAT?

This semester I was prompt to complete an honors assignment that exceed the normal curriculum of my classes. This project must expand through-out the whole semesters. The project must have multiply component that include research, a presentation, and a writing component.

WHY?

The reason that I complete this honors project every semesters is to stay in the South Mountain Community College Honors program. In order to be in this Honors program students are required to maintain a GPA of 3.25 through out the whole time they attend South Mountain, complete 3 honors credits every semester, and attend 2 co-curricular events during the semester.

My Project

For my project I was prompted to learn how to use a textile printer, a digitizer, and a heat press. Learning these 3 machine was the research aspect of my project. Once I learned how to use all three of these machines, I was prompted to write a user instruction manual for all three of the machines. Writing the user manuals was the writing aspect of my project. Finally, I had to present the information, I worked with one student teaching them all 3 of the machines with the manuals that I wrote until they were able to use the machines on their own. Now I present to all of you the process of my honors project.
